

Our Future World...

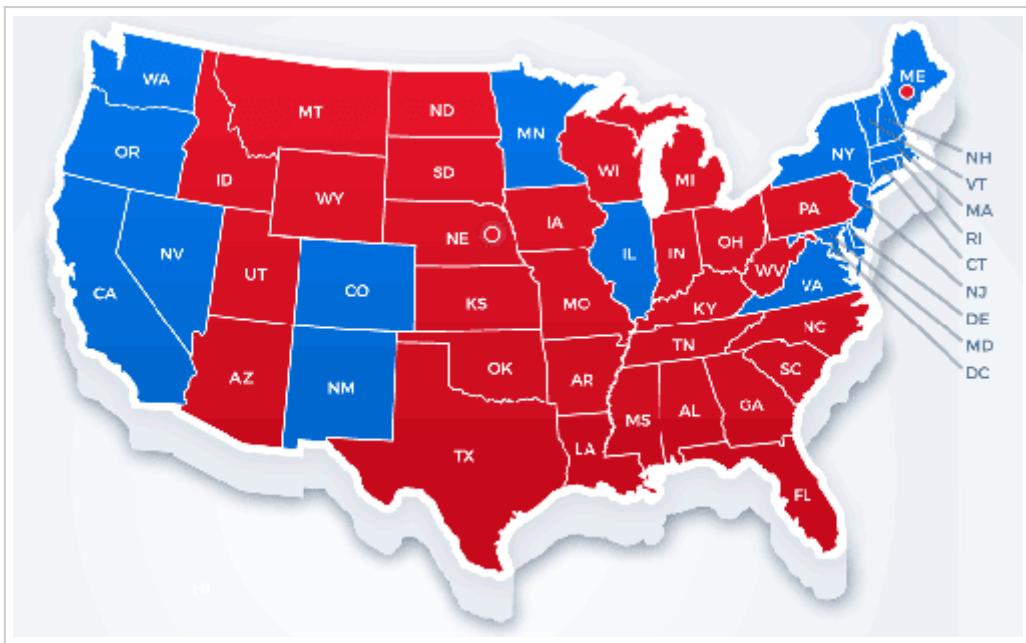

Ever since I began working on my Banking Solution in 1981, I have tried my best to imagine what the world could be like.... and how things could be “fixed” so that all humanity could flourish in the 21st Century.

This is a write-up that gives an overview of those ideas.

* * *

Politics

This country is so politically divided that government is nearly unable to get anything done — so my suggestion would be to have **TWO** presidents — the winner of the presidential election would be **THE President of the United States**.... but the losing candidate would be **“The Secondary President”**... he would be the head of his states, whatever their color. **THE President** would control national policy and have control of the Nuclear Football.... and each President could direct the functioning of their **Red-or-Blue States**....

If the **Red States** want to ban abortions, they could — and the **Blue States** could continue to keep abortion legal.

When the swearing-in ceremony takes place every 4 years, *each President will take an oath not to secede from the Union*. This country will remain The United States of America — no state(s) can secede! And each political party can “do their best” to make their states flourish. Be they **Red**, or be they **Blue** — they will do their best.

Back in the 1980's I did a comic strip where I suggested a solution for creating more jobs — to do so by splitting each of our 50 states into 100 states! Thus needing *twice as many governors*, etc. — this idea was based upon the way that Northern California hates Southern California for taking so much of their water, so splitting them into 2 states would be a natural thing to consider.... so we split them all.... 50 states become 100 states! More jobs to run twice as many state governments....

BTW, with my **One Bank** the southern part of California would easily be able to build numerous Desalination Plants that could pipe water inland to water all their crops. The **One Bank** would function for both the **Red** and the **Blue States** — and each State gets to do their best for society. Chances are that there will be no need for collecting taxes, because the **One Bank** has no problems finding \$\$\$ to do the things society needs to do!

* * *

Economic Solutions

***(See www.TheBankingSolution.com)**

The **One Bank** (which merely links all the existing computer systems of all the banks in America), would prevent ALL foreclosures — taking just a percentage of monthly incomes to pay mortgages/rent — unlimited new homes can be immediately built for those who need them — the **National Debt** will stop climbing, no more \$\$\$ will be borrowed from other sources, \$\$\$ will be inflated into existence within the **One Bank** to meet the needs of society! And the **National Debt** will be

“paid off” by periodically using the \$\$\$ brought in monthly for mortgage payments... (mortgage payment monies will vanish out of existence, back to where they came to make those mortgage loans — unless used to pay off the **National Debt**)....

Health Care

The **One Bank** will cover reasonable charges for critical health care (no more \$25 aspirins!!) — and it's a bank that is not worried about “getting its money back”.... peoples' health is more important!!

Solar Power and Electric Cars

The **One Bank** would fund these things — and not worry about “getting the \$\$\$ back”....

The 2 forms of Inflation SOLVED

90% of the money currently in circulation is *computer numbers that have been created out of thin air* — and for the first time in human history, we can control BOTH forms of inflation. Money is created out of thin air to do the things society needs, then *de-inflated out of existence* when it is repaid at whatever rate it is repaid. And because no one faces foreclosures, they will not need to raise their prices on goods/services.

House & Flood/Fire Insurance

There will be no more need for **Insurance Companies** to cover houses — when a flood or fire destroys a house, its debt is removed, and a new loan is granted to build a new home by the **One Bank**. We might *keep the Insurance Companies* that cover automobiles & trucks, etc. — the people who buy cars must pay for them from \$\$\$ they're earning, and if they can't keep making their payments, those cars could be re-possessed. And if they get into accidents, they are financially responsible.

Covid-19

Covid-19 has wrecked havoc with people working their jobs and being able to pay their mortgages and rents — but with the **One Bank** system in place, it won't matter! *No one will be foreclosed on, and no one will be evicted!* Society needs to focus on dealing with staying healthy, and not be tortured by concerns over losing their homes.

* * *

Why should anyone listen to Me?

I'm a Christian who worked with the man who is credited with these discoveries:

***** Noah's Ark !!*****

***** Sodom & Gomorrah !!*****

***** The Red Sea Crossing !!*****

***** The Real Mt. Sinai !!*****

***** The Ark of the Covenant !!!!!*****

In 1994-1996 I managed **Ron Wyatt's 1st Museum**, where for the very first time we shared the documentation of Ron's extremely important discoveries with the entire world — ****WITH THE WHOLE WORLD**** — so it is up to you folks, *do you or don't you think you should listen to me?* And give my ideas some serious consideration?

Everyone wants certain problems in this world fixed, and I have spent decades trying to do this — and, on top of it all, *I "just happened" to work with the man whom GOD used to find some of the most important biblical archaeological sites on the planet!!*

All I have ever wanted was to see a national discussion of the merits of my banking solution, and respect paid to the discoveries I've spent the past 30+ years working with.... SO CAN WE BEGIN THE DISCUSSION?

We SERIOUSLY NEED TO correct and “reboot” society — and IMPROVE IT — *and we-the-people should be able to do it if we want to do it!!!*
